## Race/ethnicity: Black Ohioans

- Although racist policies such as slavery, Jim Crow and redlining were eliminated years ago, the long-term impact of these policies persists.
- These policies, coupled with continued discrimination/racism, have led to poorer socio-economic and community conditions for black Ohioans. Because of this, **black Ohioans do not have the same opportunity as white Ohioans to live a healthy life.**
- Evidence-based policies that can be deployed to close health outcome gaps for black Ohioans include X, X and X.

*This profile describe the magnitude of difference between black Ohioans and white Ohioans.*

**Note:** Darker red indicates larger magnitude of difference  
 \*Disparity ratio is less than 1, indicating that outcomes are better for black Ohioans compared to white Ohioans

## Education and income

- Having an income sufficient to meet basic needs is critical for preventing and treating health problems.
- Postsecondary education (including an industry credential) lays the foundation for positive employment outcomes and higher lifetime earnings. Because of this, **Ohioans with less than a high school degree do not have the same opportunities as those with a college degree to live a healthy life.**
- Evidence-based policies that can be deployed to close health outcome gaps related to education and income include X, X and X.

*This profile describe the magnitude of difference between Ohioans with less than a high school education and Ohioans with a college degree or more. When educational attainment data is not available, the disparity ratio describes the difference between low-income and high-income Ohioans.*

**Note:** Darker red indicates larger magnitude of difference
