

Adverse childhood experiences (ACEs) Ohio impact project Conceptual framework

Equity

All children in Ohio can achieve their full health potential. This means all children in Ohio live in safe and stable families and communities, with positive supports for leading a long and healthy life. Equity can only be achieved if racism, ableism, homophobia, xenophobia and other forms of discrimination impacting Ohio's children and families are eliminated.

Brief 1
Health impact of ACEs in Ohio
 (August 2020)

Brief 2
Economic impact of ACEs in Ohio
 (September – December 2020)

Brief 3
How can we improve?
 (January-March 2021)

Online resource page

Short-term outcomes

- 1 Policymakers and other stakeholders have a primer on ACEs
- 2 Policymakers and other stakeholders understand the health and economic consequences of ACEs, including which ACEs have the most significant health and economic impacts on Ohioans
- 3 Policymakers and other stakeholders have a strategic set of evidence-informed, cost-effective strategies to prevent and mitigate the impact of ACEs and advance equity, including strategies that promote protective factors and resiliency

Mid-term outcomes

Policymakers and other stakeholders use information to implement a strategic and comprehensive approach to prevent and mitigate the impact of ACEs and advance equity in Ohio through:

- Allocation of resources to cost-effective, evidence-informed strategies
- Advocacy and policy change
- State and local level cross-sector coordination and collaboration

Long-term outcomes

- Improved health and well-being for all Ohioans
- Reduced health and economic burden of ACEs in Ohio

Reduced ACEs exposure

HPIO directly influences outcomes

HPIO is one of many factors that influences outcomes

Note: Multi-sector advisory group to inform development of policy briefs and resource page. Timelines may change.
